**COMMUNITY  
NETWORK  
XCHANGE**  
*AsiaPacific*  
**2022**

**Theme:**

**Walking the Talk with the Internet,  
Community & Networks**

Organised by

Principal Partners

## Overview:

Community Network Xchange (CNX) enters its sixth year in 2022. CNX Asia Pacific was first organised in 2017, **focusing on bringing together community network practitioners and enthusiasts of community-driven Internet connectivity to exchange ideas and serve as catalysts for the grassroots connectivity movement.** Conceived and **organised by DEF and the ISOC** CNX has been actively supported through the years by organisations such as APC, APNIC, A4AI, and many others. The series of events we are organising in 2022 will highlight stories of network builders on the ground foregrounding how their labour of love and passion contributes to bringing the Internet to their communities. Further, **CNX 2022 will also bring out the stories, challenges, and successes of diverse community networks from different parts of the world.** Through these events, we intend to share our collective knowledge and learnings and empower a movement of large-scale implementation of community networks for Internet access. This year, keeping in mind the evolving nature of the pandemic, associated travel challenges and online event fatigue, CNX will be spread across five sessions between June and October.

Time: June to October 2022

Duration: Five months - One session every month with the last summit in October

## Dates:

**June 29;** 1000 hrs - 1200 hrs IST / 1230-1430 SGT / 0430-0630 UTC

**July 29;** 1000 hrs - 1200 hrs IST / 1230-1430 SGT / 0430-0630 UTC

**August 29;** 1000 hrs - 1200 hrs IST / 1230-1430 SGT / 0430-0630 UTC

**September 29;** 1000 hrs - 1200 hrs IST / 1230-1430 SGT / 0430-0630 UTC

**October 29;** 1000 hrs - 1200 hrs IST / 1230-1430 SGT / 0430-0630 UTC

## Session Structure:

In each session, one or more practitioners from a **Community Network (CN)** site will be reporting from the ground. While they are reporting, they will engage people from the local community who would be giving a **context of their locality, network infrastructure, their local usage needs and the impact.** It will be the local community's story told by the locals themselves.

Each session would be 90 minutes long. There will be three parts to each session: A 10-minute long introduction that will introduce the topic and the case study / walk-the-talk story; the second session would be a 20-minute report from the ground. A representative would report from the CN site on camera while simultaneously engaging the community members, prompting them to respond to specific questions on the details of the particular CN. The last session would be a discussion and Q&A with two subject matter experts. They would connect virtually and engage in a discussion with the representatives on the ground similar to live news reporting with a panel discussion.

There will be a total of 10 walk-the-talk stories covered in five sessions from **June to October 2022.** We will have ten cases from ten locations for ten CNs.

## JUNE 29, 2022 - CNX 2022 SERIES 1

*Walking the Talk with Internet, Community and Networks*

### *Session details:*

*(Total Time Allocated 90 Minutes)*
